High Impact Decision Making Tools For:
District Superintendents and Administrators
School Board Members
State Education Departments
School Principals
Plus:
Financial Managers
Human Resources Managers
Operations and Facilities Managers
Classroom Teachers

THE COMPREHENSIVE, TOOL SET THAT SUPPORTS ADDITIONAL EDUCATIONAL COMMUNITY STAKEHOLDERS AND ENABLES MORE COMPLEX INFORMED DECISION MAKING

What is EXPAND?

EXPAND is the **Edvantage™** module that provides you with additional levels of detailed data needed to support expanded district, school level, and individual classroom analysis. The kind of information required to make high impact decisions regarding sound financial management, improving instruction, and improving learning opportunities.

Who uses EXPAND?

EXPAND builds upon the CORE foundation, by providing enhanced data and analysis for key district and school managers and includes completely new capabilities for financial managers, human resource managers and classroom teachers. Principals, school administrators, operations personnel, career counselors, and program managers use EXPAND to provide the information and analytical tools needed to help address areas such as developing instructional plans for students, identifying potential learning impediments, assessing effectiveness of previous interventions, and to check learning progress in real time. Additionally, EXPAND's background information helps personnel charged with improving security, law enforcement, social welfare and juvenile justice programs. EXPAND supports all NCLB and State reporting requirements.

How does EXPAND help understand each student and improve student achievement?

EXPAND gives you the tools to access each students history, behavior trends, attendance rates, special circum-

Edvantage™ EXPAND

Analytic & Reporting Platform

stances, socio-economic background, demographics, previous learning progress, program participation history and previous classroom marks to truly understand each student, enabling educators to better identify and remove obstacles to help advance that student's opportunity for achievement. Self-service information retrieval, drill down analysis, comparative metrics and structured reports are obtained by non-technical users using a guided on-screen dashboard. EXPAND also supports ad-hoc data queries and end-user report development capabilities for more technically advanced users.

How can EXPAND improve instruction?

Imagine if you had an expanded arsenal of analytical tools applied to more data that could help you make more informed decisions for needs based teacher development planning, needs-based teaching and resource allocation planning, instructional strategies evaluation, curriculum alignment analysis, and textbook effectiveness evaluation. EXPAND gives you the tools needed to make a difference.

What about learning opportunities improvement?

View enrollment trends, determine optimal class sizing, effective class scheduling and curriculum. Study discipline patterns and develop effective strategies regarding parental participation, improve social support planning, and create a safer learning environment. EXPAND gives you deeper information, expanding your insight to make the right decisions.

How can EXPAND help improve operational efficiency?

EXPAND brings previously obscured information to the forefront, giving you a clearer picture to help you facilitate and streamline operations regarding leadership succession planning, need-based resource allocation, staffing projections and compensation planning. It can help focus on professional development objectives, crisis response planning and even inter-governmental agency information sharing.

What about fiscal management?

Funds allocation visibility, long-term facilities and capacity planning, facility consolidation opportunities, shared services planning and more – with EXPAND, fiscal decisions are clearly arrived at, giving you the budgetary and expense controls required.

Why Edvantage™?

Edvantage™, and the **Edvantage™** modules; **CORE**, **EXPAND**, **ADVANCE** and **EXPLORE**, represent the national standard in proven software for informed decision making in public education and has been implemented by many of the largest school districts in the country. The **Edvantage™** technology includes data warehousing, business intelligence, dashboards, data mining and analytical applications. Each **Edvantage™** module provides further possibilities, as more analytical tools are applied to more data for more in-depth decision making.

Other Edvantage™ enhancement modules.

To further increase the power of your EXPAND module, ask about these **Edvantage™** enhancement modules now available:
